I am a Junior Web Developer with a focus on Front End development. I have a lot of passion and joy towards programming. I am very detailed oriented and enjoy seeing the product in which I am working with. I believe the world is filled with a lot opportunity for a web developer especially in the age of technology. My goal is to make the world a more tech friendly with the developer skills I have learned.

Skills

Node.js, Javascript,GIT, Github,MySQL, Firebase, HTML,CSS, Bootstrap, Media Queries, APIs, JSON, Command Line,Bilingual in English and Spanish, Strong multitasking abilities, detail-oriented, flexible and responsible, Proficient in Microsoft Word, Excel, PowerPoint Well-developed interpersonal and customer service skills; able to work with individuals/groups at all levels

Relevant Work Experience

Rutgers Coding Bootcamp   2016
- Full Stack Web Development course which covers a wide range of topics and libraries. Intensive 20+ hour a week course with homeworks and projects on a weekly basis. Each week is a test itself which try and test the skills learned in class. Every class helps develop and strengthen new topics which vary between the front end and back end technologies.

Applications Built

The Psychic Game   2016
- A guessing game in which the user is prompted to hit any key to begin.
- Once the game has begun the computer chooses a random letter from A-Z and the user is asked to guess which letter has been chosen by the computer.
- Each input is then compared and contrasted, then each incorrect guess is recorded until the user either runs out of guesses or finally guesses the correct one.

The Crystal Collector Game   2016
- A creative fun and interactive browser game which uses basic HTML, JQuery, and CSS.
- This is a guessing game in which the user is showed a number at the start of the game.
- The user must then try and reach the number by clicking on the different crystals but must not go over, if the user goes over the game is over.
